MENTORED WORKSHOP ON QUALITATIVE DATA ANALYSIS WITH ATLAS.TI

Dates: 28th to 31st August, 2017

Location: MUFIILPE classroom, 5th floor, Health Sciences Library, Manipal University, Manipal.

PARTICIPATION FEE - 8000 INR

The analysis of qualitative research involves aiming to uncover and or understand the big picture by using the data to describe the phenomenon and what this means. Qualitative analysis involves labelling and coding all of the data in order that similarities and differences can be recognized. The highlight of this mentored workshop is the use of Atlas.ti qualitative data analysis software. Workshop will cover key issues related to qualitative data analysis.

Certificate will be issued to participants who have attended all sessions.

About TCQM:

Transdisciplinary Centre for Qualitative Methods (tcqm) under Public Health Evidence South Asia (PHESA), a joint initiative by Manipal University and the University of Groningen, The Netherlands, and aims to act as a regional hub for capacity building in qualitative methods in South Asia. TCQM will educate, facilitate and promote trans-disciplinary qualitative research for a comprehensive understanding of the issues pertaining to public health.

Outline of topics:

- Preparing your data for Analysis
- Coding and code book development
- Categorizing and conceptualizing
- Presenting your findings
- Using the Atlas.ti

Who can apply:

- Experience in Qualitative data collection
- Participants with ready transcripts of data

Registration @ www.tcqm.manipal.edu

Max: 15 participants.

Last date to apply: 21.08.2017

INSTRUCTORS: Dr. Ajay Bailey, Assistant professor, University of Groningen, Netherlands/ Coordinator, TCQM, Manipal University, Manipal and other experts from the different institutions will mentor and train participants during the workshop.
